nG Firewall

Magic Login Pro · https://handyplugins.co/docs/magic-login-ng-firewall-configuration/

When magic login URLs blocked from nG firewall, you may want to extend firewall rules to allow magic login urls.

If you are using runcloud:

```
# allow magic login links
if ($request_uri ~ "magic-login"){
    set $gfwreason "allow";
}
```

or if you are running non customized version:

```
if ($request_uri ~ "magic-login"){
        set $7g_drop_bad_request 0;
        set $7g_drop_bad_referer 0;
        set $7g_drop_bad_query_string 0;
        set $7g_drop_not_allowed_method 0;
        set $7g_drop_bad_bot 0;
}
```
