Customer Dashboard

PaddlePress Pro · https://handyplugins.co/docs/paddlepress-pro-customer-dashboard/

PaddlePress Pro includes a complete customer dashboard. Customers can easily view their subscriptions and options to upgrade, update, or cancel their subscriptions. They can also access one-off purchases and receipts with their transactions.

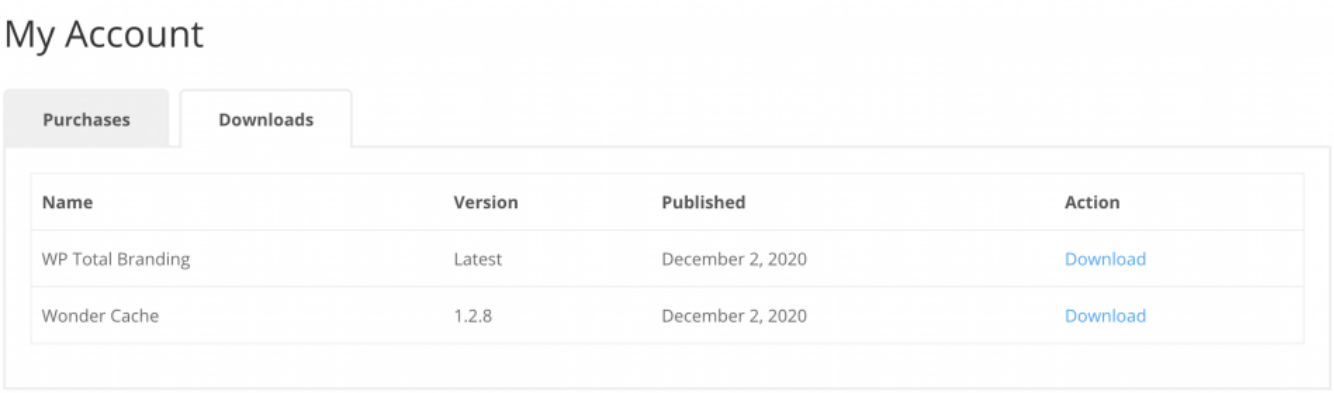

It works with any WordPress theme and simple to integrate via shortcode.

Here are the sections of the customer dashboard:

Downloads

Your downloadable items are placed under the "downloads" tab. The customer only sees what they can download, so you can restrict downloads based on the membership level.

Website License Management

If you have enabled software licensing, you can manage registered websites under your account. It's easy and convenient.
