Software Licensing

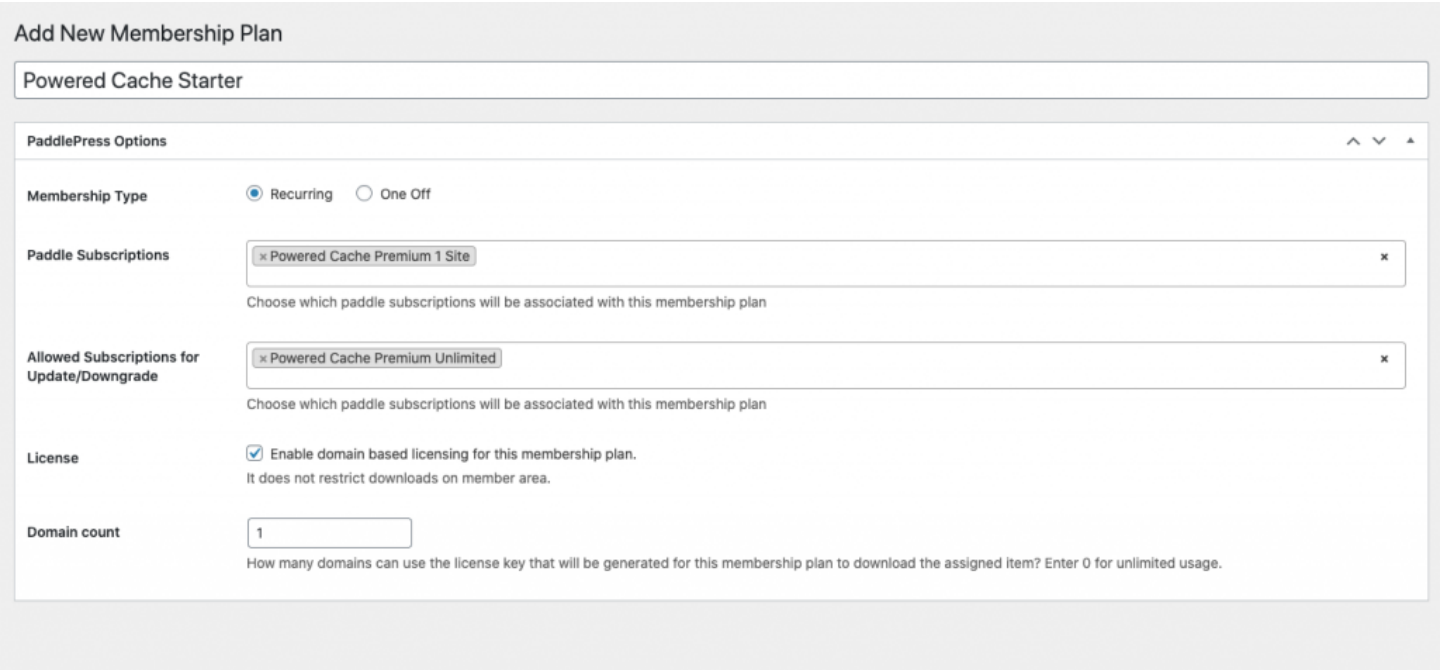

PaddlePress Pro · https://handyplugins.co/docs/paddlepress-pro-software-licensing/

Software Licensing has been built specifically for WordPress plugin and theme authors. It would be better to use Paddle's own SDKs for mac and windows apps.

1) Enable Software Licensing

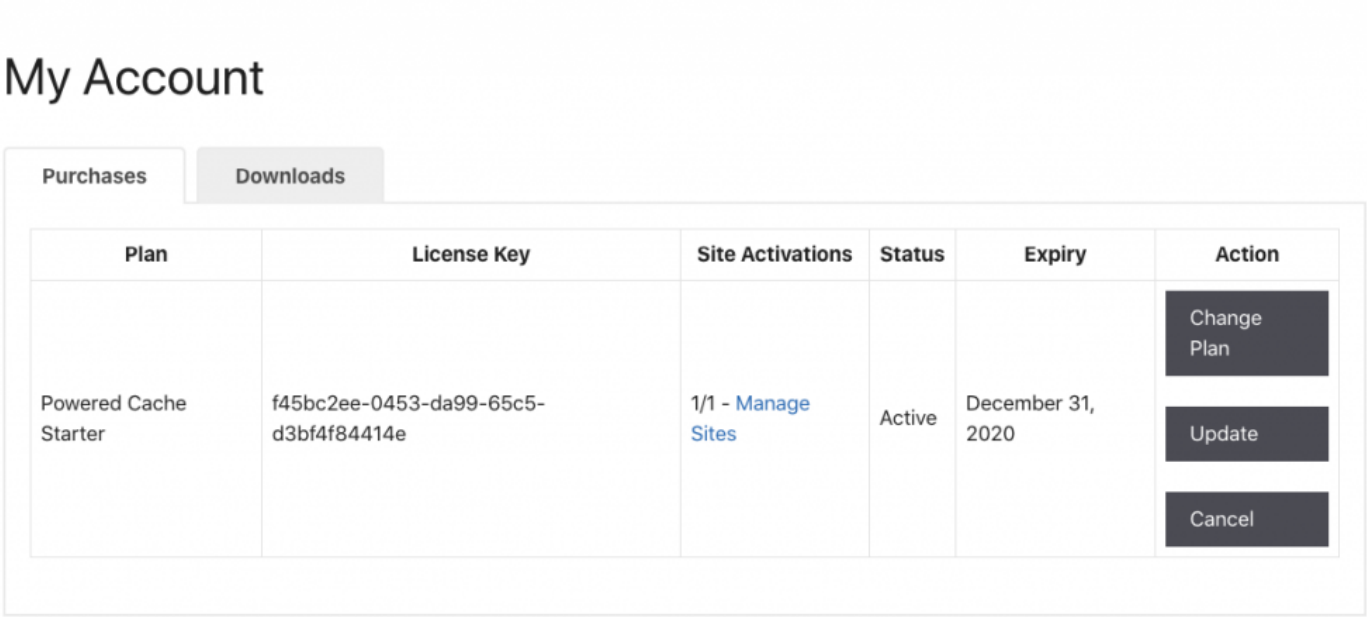

2) Enable Software Licensing for Membership

License key generation works automatically once someone purchases a product. You just need to enable license creation and set an activation limit. (Enter 0 for unlimited licensing)

It worth creating separate membership plans for each paddle subscription plan if you have a plan to restrict domain counts.

3) My Account

The license key will be available on the accounts page. Also, it can be sent via email once the purchase completed.
