Write a Blog Post

Handywriter · https://handyplugins.co/docs/write-a-blog-post-with-handywriter/

Handywriter can write a blog post from scratch, and it can save lots of time when you start a new blog post.

In order to use this feature, you have to enter the title first; since AI can't create content without a clue, it will use the title as input and then will start typing directly into the editor.
